DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-27 and 29-42 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The language of "the modified polyester resin being reactive with a compound having an active hydrogen group" purports to cover everything which will perform the desired functions regardless of its composition and, in effect recites the compounds by what is desired that they do rather than what they are. By not setting forth specific compositions the claims are invalid as vague, indefinite and functional since they cover any conceivable combination of ingredients either presently existing or which might be discovered in the future and which would impart the desired characteristics. Applicants in response to the above should point out in the specification or examples other group than isocyanate or epoxy group which meet the above reaction capability.
3. Claim 18 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. U.S.P. 6326115 and 2003/0027074.
